

Ejercicios resueltos > Short Compositions

What type of job would you prefer - technical or artistic?

**Planificación**

- Empieza por responder a la pregunta: ¿qué tipo de trabajo prefieres?
- Razona tu respuesta: proporciona argumentos a favor de tu elección.
- Explica las ventajas y desventajas de cada tipo de trabajo.
- Utiliza expresiones para introducir tus opiniones: *I think, I believe...*

Write about 100 to 150 words in the following topic: What type of job would you prefer - technical or artistic?

Whenever I think of my future career, I always imagine myself involved in an artistic job rather than a technical one. I prefer artistic jobs because they are more creative and at first sight they seem more amusing to me. I am very attracted to the design field. I believe it is a challenging job in which you need to be open and alert to new ideas and be able to execute them in an effective way.

On the other hand, technical jobs appear to be more rigid and tedious. I do not like to work fixed hours every day or work inside an office and I think both are characteristics of many technical jobs.

However, I am not going to close the door on any opportunity that comes across.
