Write about 100 to 150 words in the following topic: **What is your opinion about changes in physical appearance?**

Generally speaking, I think that many people are too worried about their physical appearance and sometimes they undergo surgeries which are not only dangerous but completely unnecessary.

Nowadays everybody who wants to change a part of their body has access to surgery, and with very few limitations, to the extent that teenagers are now asking their parents for a nose reshaping as a birthday present.

I am worried that people undergo dangerous surgeries not because they suffer from a lifelong complex about a part of their body that prevents them from being absolutely happy but just because they want the lips of a famous actress or the chin of a model. In this last case, I believe that surgery should be prevented.
